DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to a method for determining heart rate recovery, classified in class 600, subclass 519.
 - II. Claim 15, drawn to an implantable cardiac device, classified in class 600, subclass 509.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another and materially different apparatus such as an entirely implantable cardiac sensing device that does not include transmitting heart rates to an external device.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. This application contains claims directed to the following patentably distinct species of an embodiment of the claimed invention:

Art Unit: 3762

Species I, the embodiment wherein step (b) comprises identifying the first heart rate when at least one heart rate measurement exceeds the first heart rate measurement threshold for a predetermined period of time (see Claim 2).

Species II, the embodiment wherein step (b) comprises identifying the first heart rate when the activity level exceeds the first activity threshold for a predetermined period of time (see Claim 6).

Applicant is required under 35 U.S.C. 121 to elect between Species I or II for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no Claims are generic.

5. This application contains claims directed to the following patentably distinct species of an embodiment of the claimed invention:

Species III, the embodiment wherein step (c) comprises identifying the second heart rate when the activity level falls below the second activity threshold for a predetermined time (see Claim 8).

Species IV, the embodiment wherein step (c) comprises identifying the second heart rate when, after a predetermined period of time, the following conditions occur: (iii) a heart rate measurement is less than the heart rate measurement of step (c)(i), and (iv) the activity level falls below a third activity threshold (see Claim 10).

Applicant is required under 35 U.S.C. 121 to elect between Species III or IV for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no Claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jessica L. Reidel whose telephone number is (571) 272-2129. The examiner can normally be reached on Mon-Thurs 7-4:30 and every other Friday 7-3:30.
